CMP-5058A/CMP-6058A/CMP-7058A Artificial Intelligence Coursework Appendix

Appendix A. MediaPipe in CMP Lab PCs

MediaPipe may only works with NumPy v1 and the CMP lab PCs use NumPy v2 by default. The CMP IT Support Team has provided the instructions below to setup a new conda virtual environment with MediaPipe and NumPy v1.

1. Open 'Anaconda PowerShell prompt'

2. Create a new conda environment, and activate it. Execute the instructions

```
(base) > conda create -n "AI-CW" "python<3.13" -y
(base) > conda activate AI-CW
(AI-CW) >
```

3. Install MediaPipe and additional libraries

```
(AI-CW) > python -m pip install mediapipe numpy matplotlib opencv-python
```

4. To use Spyder with numpy v1, go via conda as some packages need building. Install Spyder first, then start it.

```
(AI-CW) > conda install spyder "numpy<2" -y
(AI-CW) > spyder
```

According to the CMP IT team, this process takes around 8 minutes in the lab SCI 0.59. Be patient if it takes a bit longer.

The AI-CW conda environment should persist between lab sessions in the machine you installed it, but it doesn't follow you around. If you use a different PC you'll have to create the environment again.

Follow the instructions below whenever you want to use the AI-CW environment:

1. Open 'Anaconda PowerShell prompt'
2. Activate conda environment
   (base) > conda activate AI-CW2
3. Start Spyder
   (AI-CW2) > spyder

Ask ATs or the assessment setter if you need assistance with this conda environment.

Appendix B. Resources from the Library for designing an effective poster

The UEA Library has provided the following materials, which you can use, or you may search additional ones online to learn how to create an effective poster:

- E-book: Better Posters: plan, design and present a better academic poster
- The academic skills handbook: your guide to success in writing, thinking and communicating at university
- Presenting your research: conferences, symposiums, poster presentations and beyond
- Posters and Presentations
- Scientific Presentation Skills: how to design effective research posters and deliver powerful academic presentations

The Learning Enhancement Team provides support to improve your academic writing and skills via https://my.uea.ac.uk/divisions/library-and-learning-enhancement/learning-enhancement.
